

Historical Archeology of Tourism in Yellowstone National Park (When the Land Meets the Sea)

Far too often in the field of archeology, the wheel of understanding and insight has a narrow focus that fails to recognize critical studies. Crucial information regarding pivotal archeological investigations at a variety of sites worldwide is extremely difficult, if not impossible, to obtain. The majority of archeological analysis and reporting, at best, has limited publication. The majority of archeological reports are rarely seen and when published are often only in obscure or out-of-print journals the reports are almost as hard to find as the archeological sites themselves. There is a desperate need to pull seminal archeological writings together into single issue or thematic volumes. It is the intention of this series, *When the Land Meets the Sea*, to address this problem as it relates to archeological work that encompasses both terrestrial and underwater archeology on a single site or on a collection of related sites. For example, despite the fact that we know that bays and waterways structured historic settlement, there is a lack of archeological literature that looks at both the nautical and terrestrial signatures of watersheds influence on historic culture.

Available in: Hardcover. This volume contains three studies that trace the history of tourism in Yellowstone National Park through material It is the intention of this series, *When the Land Meets the Sea*, to address this problem as it relates to archeological work that encompasses both Nutrient budgets, marsh inundation under sea-level rise scenarios, and sediment ..
